

IndoFast Energy, a joint venture between IOCL and SUN Mobility, is driving EV adoption in India through its Battery-as-a-Service (BaaS) model. By building one of the largest battery-swapping networks, it enables two and three-wheelers to swap batteries in seconds, making electric mobility faster, affordable, and convenient.

Collaborating with Quantum Energy, we are confident in driving the mass adoption of electric vehicles globally, enabling a seamless transition to a sustainable and pollution-free future.

Take the Quantum Leap for Your Fleet

Why Choose Quantum's e-scooters?

- Powered by a **1500 W motor**
- Gradeability of **12°**
- **12" tyres** for more ground clearance
- **Wide foot board** for accommodating goods
- Water resistant **IP67 rated motor**
- **Connected fleet with telematics** to monitor health
- **Strong rigid chassis design** for sturdiness & stability **Combi brakes** for better braking power

Top Speed
45 kmph *

Wheels
12"

Motor Power
1500 W | 2500 W
(Nominal) (Peak)

Range

up to 80 kms * per swap

Battery Specifications

Battery Parameter	Description
Cell Type	Li-ion
Total Pack Capacity	2.1 KWH
Weight	14.4 Kg
Nominal Pack Voltage	48 V
Communication	CAN Protocol
Audio and Visual Indication	SoC and Faults
Safety Standard	As per AIS-156

Network and Touch Points

Indofast Energy is powering our new Bizness XS. Now, you can swap your battery at a Indofast Energy swapping station. Say bye to range anxiety.
